

Package: geokodigo (via r-universe)

September 20, 2024

Type Package

Title An Interface to the Philippine Standard Geographic Codes

Version 0.0.0.9000

Description The Philippine Standard Geographic Code (PSGC) is a classification and coding of the geographical-political subdivisions of the country, such as the region, the province, the municipality/city and the barangay. The PSGC is currently compiled and updated quarterly through a collaborative effort of the Philippine Statistics Authority (PSA) and its interagency Technical Working Group on Geographic Code (TWGGC) composed of the Department of the Interior and Local Government (DILG), Commission on Elections (COMELEC), National Mapping and Resource Information Authority (NAMRIA), and the Land Management Bureau (LMB). This package provides utilities for accessing different versions of the PSGC over time, formatting and structuring them into machine-readable formats.
