Package: geokodigo (via r-universe)

August 28, 2024

Type Package

Title An Interface to the Philippine Standard Geographic Codes

Version 0.0.0.9000

Description The Philippine Standard Geographic Code (PSGC) is a
classification and coding of the geographical-political
subdivisions of the country, such as the region, the province,
the municipality/city and the barangay. The PSGC is currently
compiled and updated quarterly through a collaborative effort
of the Philippine Statistics Authority (PSA) and its
interagency Technical Working Group on Geographic Code (TWGGC)
composed of the Department of the Interior and Local Government
(DILG), Commission on Elections (COMELEC), National Mapping and
Resource Information Authority (NAMRIA), and the Land
Management Bureau (LMB). This package provides utilities for
accessing different versions of the PSGC over time, formatting
and structuring them into machine-readable formats.
